Success

Sushant Singh Rajput said

$Succcess \neq Money + Fame$ but $Succcess = Now + excitement$

$$Success = \int_{Birth}^{Death} \sum^{\text{All causes}} Excitement_{cause}(t)\,dt$$

This equation beautifully explains the true meaning of **Success** proposed by **Sushant Singh Rajput.**

We also need Money or fame because those are essential or important in life as petrol in a car but the true meaning of **Success** proposed by **Sushant Singh Rajput** is to focus on now + excitement.

Where,

$\int_{Birth}^{Death} \sum^{\text{All causes}} Excitement_{cause}(t)\,dt$ is represents Total excitement we felt in our life due to so many causes and that cause can be deeply effected by the amount of money or fame.

Prof – Now, Let

- $Money(t)$ and $Fame(t)$ (1)
  represents Money and Fame someone had at some time t.

- $mind_{Money}(t)$ and $mind_{Fame}(t)$ (2)
  represents the amount of Money and Fame someone feels he/she need to feel happy at some time t.

- $Happiness_{cause}(t)$ (3)
  represents the amount of Happiness someone feels due to some cause at some time t.

Now, By using equation (3)
Equation (2) can be write as follow

$$mind_{Money}(t) = \lim_{Money(t) \to c_1} Happiness_{Money(t)} \; , \qquad (4)$$

$$mind_{Fame}(t) = \lim_{Fame(t) \to c_2} Happiness_{Fame(t)} \qquad (5)$$

where c_1 and c_2 is just some values and these values may varies from person to person, situation to situation i.e. One person may feels happy with getting ₹ 10000 and on the other hand other person may feels not enough happy from getting ₹ 1lakh and same as Fame, someone may feels so much happy from just little Fame.

Now, When a parson achieve his/her goals of Money and Fame then he/she will feels happy for a while after that he/she will set new higher goals. (6)

Now, let $time_{Money(t)}$ and $time_{Fame(t)}$ represents the time for a person feels happy after achieving his/her Money and Fame goals respectively.

Now, After $time_{Money(t)}$ and $time_{Fame(t)}$

$$mind_{Money}(t) = \lim_{Money(t) \to c_3} Happiness_{Money(t)} ,$$ (7)

$$mind_{Fame}(t) = \lim_{Fame(t) \to c_4} Happiness_{Fame(t)}$$ (8)

But, According to (6)

$$c_3 \geq c_1 \text{ and } c_4 \geq c_2$$ (9)

From above equation (9), It's clear that the desire of getting more money or fame will increasing forever and the amount in which it increases will varies according to person to person or situation to situation.

So, Now it's clear that it is a bad idea to represent **Success** in the form of $Money(t)$ and $Fame(t)$.

On the other hand if we somehow write **Success** in the from of $Excitement(t)$ as proposed by **Sushant Singh Rajput.**

Now, Let

- $Excitement_{cause}(t)$
  represents the amount of excitement someone may feels due to some cause at some time t.

We know, When we feels excitement about anything then at that moment we feels the real happiness.

So, We can rewrite the over all Success of someone in the form of Excitement as the integration of summation of amount of excitements someone felt by all causes as follow.

$$Success = \int_{Birth}^{Death} \sum^{All\ causes} Excitement_{cause}(t)\, dt$$

Hence proved this beautiful equation about success.
